Net Interest Income and Net Interest Margin

Net Interest Income Trends⁽¹⁾

Net Interest Margin Trends

3Q14 Net Interest Income / Net Interest Margin

- Net interest income grew \$6.5 million, or 5.6%, reflecting average earning asset growth of 3.8% and \$4.1 million higher accretible yield adjustments
 - ✓ Accretible yield adjustments were partially offset by \$800k provision for loan losses related to credit resolutions in the acquired portfolio
- The reported net interest margin expanded 3 basis points to 3.63%
 - ✓ The net interest margin benefited from the strong average earning asset and deposit growth and the higher accretible yield
 - ✓ The core net interest margin narrowed primarily as a result of the current rate and competitive environment and the related yield impact given the strong loan volume experienced during 2Q14 and 3Q14 and, to a lesser extent, a slightly lower yield on the securities portfolio, and the funding mix change as \$250 million in borrowings was termed out to take advantage of the current low rates
